---

### TECHNICAL PROJECTS

---

- **Blog App**

- A React hooks application of the clone of Instagram. It has the same functionality as a regular Instagram app.
- · Designed a RESTful API database schema using MongoDB
- · Integrated NodeJS to login, sign-up, and upload picture
- · Used Plain CSS for styling
- · Used React Hooks to manage state and to keep information organized

- **IP-Tracker** - [GitHub](#) | [Live Site](#)

- A React hooks application allows users to track the location of their IP addresses
- · Used React Hooks to manage state and to keep information organized
- · Used Plain CSS for styling
- · Integrated Ippify API to allow search by Domains and Ip addresses
- · Deployed with Netlify for frontend

- **Shoppverse Website**

- A Next JS where users can purchase items and pay in crypto.
- · Created RESTful API database schema backend using MySQL
- · Used CSS for styling
- · Manipulated and traversed the DOM using event handlers
- · Used Trello to keep in track overflow of the Project

---

### PROFESSIONAL EXPERIENCE

---

- **Company** Whelb
- Front-end web developer Jun 2019 - Jan 2022
- · Applied my knowledge of React JS, React hooks and CSS to help code the front-end of the company's website. The website was an SASS site and it was an opportunity to develop my front end skills. I also interacted with the UI UX designer and we discussed user-friendly colors to improve User Interaction with the site. I also practiced some of my animation skills on the site too.
- **Company** ShoppVerse
- Front-end web developer Jan 2022- Till Date
- · Applied my knowledge of React JS, React hooks and CSS to help code the front-end of the company's website. The website was an e-commerce site which utilizes crypto for payment and it was an opportunity to develop my front end skills
